

PORTFOLIO

Jungin Kim

jungin3486@gmail.com

CONTENTS

1. Skills
2. Experiences
3. Projects

Skills

- **Data Handling:** SQL, Python(Pandas, Numpy), R
- **Visualization:** Redash, matplotlib
- **Database:** MySQL, PostgreSQL
- **Experimentation:** A/B testing, KPI tracking, user segmentation
- **Others :** Git, Jupyter, Slack, Pytorch

Experiences

EDUCATION

Yonsei University

M.S. in Computer Science (2023.09 – 2025.08)

Theory of Computation Lab | Advisor: Professor Yo-Sub Han

GPA: 4.01/4.30 | Research Area: Code, NLP

Sangmyung University

B.S. in Computer Software (2017.03 – 2022.02)

Network Data Science Lab | Advisor: Professor Hyunchul Kim

GPA: 3.92/4.50 | Research Area: Hate Speech Detection

Experiences

CAREER

2023.08 – 2025.08 (2 years 1month)

Research Assistant | Theory of Computation Lab, Yonsei University

Advisor: Professor Yo-Sub Han

2022.03 – 2023.04 (1year 2months)

Data Analyst | Data Team, Alookso, Inc.

2020.08 – 2020.11 (4months)

Research Assistant | Statistical Artificial Intelligence Lab, KAIST

Advisor: Professor Jaesik Choi

2019.03 – 2020.07 (1year 5months)

Research Intern | Network Data Science Lab, Sangmyung University

Advisor: Professor Hyunchul Kim

2017.08 – 2017.08 (1month)

Data Analyst Intern | Kir Team (3on3 FreeStyle), Joycity, Inc.

Experiences

AWARDS & HONORS

2020.09 – 2020.11 Awarded First Place, University Capstone Design Competition

2017.03 Awarded First Place, SK Future Industry Technology Startup Competition

Training & Certifications

2023.08 ADsP (Associate Data Analyst Certificate), Korea Data Agency

2021.12 – 2022.02 Completed AIFEL AI Bootcamp, Modu Research Institute

2021.08 Completed, Recommender System Study, Modu Research Institute

2020.12 – 2021.06 Graduated, Alice AI Track (1st Cohort), Alice

Experiences

LANGUAGES

Korean (native)

English (conversational proficiency)

TOEIC 860, OPIC IM2

Projects

PROJECT INFORMATION

Project name	Period	Affiliation
Personalized News Recommendation Algorithm	Jan 2023 ~ Mar 2023	Alookso, Inc.
My Map: Personalized User Map	Mar 2022 ~ Jun 2022	Alookso, Inc.
Officetel Price Prediction	Aug 2020 ~ Nov 2020	KAIST
COVID19: Twitter Sentiment Analysis	Mar 2020 ~ May 2020	Sangmyung University
Analysis of the Causes of User Decline in North America	Aug 2017 ~ Sep 2017	Jocity. Inc.

Projects

Personalized News Recommendation Algorithm

#Python #SQL #Recommender System

- Constructed a user-item rating matrix based on user behavior logs (e.g., read time)
- Applied matrix factorization to learn latent user/item vectors.
- Predicted unseen item ratings and ranked them for personalized recommendation.
- Conducted iterative A/B testing and log analysis, resulting in an 8% increase in average user retention time.

Generate user-item rate matrix

Matrix factorization

Predict ratings for unseen items

Workflow of the personalized recommendation algorithm using matrix factorization

Projects

My Map: Personalized User Map

#Python #SQL #UMAP

- User voting and interaction data are vectorized and projected onto a 3D sphere using UMAP.
- For each user, the sphere is rotated so that each user is positioned at the center and converted to 2D latitude-longitude coordinates for visualization.
- This process generates a personalized “My Map” for each user.

Personalized 2D map generated from 3D UMAP projection

Projects

Officetel Price Prediction

#Python #Pandas #Numpy #Scikit-learn

- Developed an officetel price prediction model aimed at automating the traditional manual real estate appraisal process.
- Extracted key features from property appraisal reports that serve as the basis for price estimation.

구분	거래사례1	거래사례2	거래사례3
빌딩명	현대캐피탈빌딩	상촌까뮤빌딩	유진그림빌딩
전경			
소재지	여의도동 15-21	여의도동 17-3	여의도동 24-3
규모	지상11층/지하5층	지상11층/지하3층	지상15층/지하3층
대지면적/용적율	4,248㎡/461.9%	5,044㎡/336.9%	1,974㎡/632.8%
건물면적 (용적율기준면적)	37,206.61㎡ (지상19,621.51㎡)	27,267.74㎡ (지상16,992.68㎡)	16,523.61㎡ (지상12,490.76㎡)
주구조	철근콘크리트구조	철근콘크리트구조	철근콘크리트구조
사용승인일	1992.08.08	1984.07.16	1981.08.05
거래시점	2013.03.05	2014.11.14	2015.02.16
매매가격(천원)	131,050,000	92,000,000	64,500,000
연면적기준 (원/㎡) (지상면적기준(원/㎡))	3,522,000 (6,679,000원/㎡)	3,374,000 (5,414,000원/㎡)	3,904,000 (5,164,000원/㎡)
연면적기준 (원/평) (지상면적기준(원/평))	11,644,000 (22,079,000)	11,154,000 (17,898,000)	12,906,000 (17,071,000)

Feature extraction process from real estate appraisal reports for price prediction

Projects

COVID19: Twitter Sentiment Analysis

#Python #Tensorflow #TwitterAPI #KoBERT

[[Blog](#)]

- Collected tweets from December to March for sentiment analysis.
- Used KoBERT to classify public sentiment on Twitter during the COVID-19 period.
- Conducted error analysis on 400 samples to identify model limitations.

Monthly sentiment trends on Twitter during
COVID-19 (example: december)

Projects

Analysis of the Causes of User Decline in North America

#R #Data Analysis

- Analysis of the Decline in North American Users of *3on3 FreeStyle*
- Analyzed user trend and sales data
- Reviewed community feedback and competitor games

Correlation between user trends and competitor game release timeline

Thank You
